# 1960 NATIONAL AIA CONVENTION TO BE HELD AT SAN FRANCISCO

WASHINGTON, D. C.—This year's annual convention of The American Institute of Architects will be held April 18 to 22 at San Francisco.

Some 2,000 architects from all parts of the country are expected to hear J. Robert Oppenheimer, director of the Princeton Institute of Advanced Studies, and Cyril Northcote Parkinson, historian and author of "Parkinson's Law" among other well-known authorities in science and the humanities.

Under the general theme "Expanding Horizons" the architects will explore the trend of political, economic, technological and philosophical developments so as to help the architectural profession to keep ahead of changes in the human environment.

Oppenheimer's and Parkinson's speeches and those of philosopher Morton Gabriel White of Harvard and sociologist Wendell Bell of the University of California will be related to architecture by panels of outstanding architects.

The panels discussions and business meetings of the convention will be held at San Francisco's new Masonic Temple. Convention headquarters will be at the Mark Hopkins Hotel.

The convention program also features the ceremonial Investiture of newly elected Fellows of the AIA and a President's Reception both at San Francisco's famous City Hall.

Other convention events include a tour through San Francisco and the Bay area's outstanding houses and an "open house" party on San Francisco's historic Jackson

Square. Convention goers are invited to participate in the host city's annual Black and White Symphony Ball.

The San Francisco Museum of Art will show an extensive exhibition of the work of LeCorbusier, world famous architect, planner, painter and sculptor. Born in Switzerland, LeCorbusier, whose real name is Charles Edouard Jeanneret, has created important buildings all over the world. Among his most famous works is the planning of the city of Chandigarh, the new capital of Punjab in India.

The LeCorbusier exhibit was designed and arranged in Switzerland. From San Francisco it will travel to Tokyo where it will be shown in LeCorbusier's new completed Museum of Western Art.

In the course of its Annual Dinner the AIA will again present a Gold Medal to an outstanding architect as well as the Institute's other awards. The R. M. Reynolds Memorial Award, the Homes for Better Living Awards and other honors will be presented at morning sessions. Winners of these awards have not yet been selected.

Another convention feature is the exhibition of new building products at the Masonic Temple. There are 91 different product exhibits.

The convention program has been worked out by a committee of the Northern California Chapter, AIA, under the chairmanship of Donn Emmons. A sub-committee headed by John Reid, San Francisco architect, has formulated the professional program.

## CHAPTER MEETING ON FEBRUARY NINETEENTH

Arrangements have been completed for the February meeting of New Hampshire Chapter, AIA. According to Richard Boehler, chairman for the winter meeting. The Calumet Club, located at 126 Lowell Street, Manchester has been selected for the meeting and dinner, to be held Friday evening, February 19.

A representative from the office of Masaki Walker and Associates, Inc., will be the speaker following the dinner. His subject will be "Landscaping."

Delegates and alternates to the AIA convention to be held at San Francisco in April, will be nominated at the February meeting.

## PLANS PROGRESSING FOR REGIONAL MEETING

Plans are being formulated for New Hampshire Chapter, AIA, to host the New England Council convention of the American Institute of Architects, John R. Holbrook, president of New Hampshire Chapter stated.

President Holbrook announced that tentative plans call for the meeting to be held in the White Mountain area, the latter part of September, or early October. Alonzo Harriman of Auburn, Maine, regional director, will be in charge of the meeting, with the subject to be discussed, "Selling of Architecture to Clients."

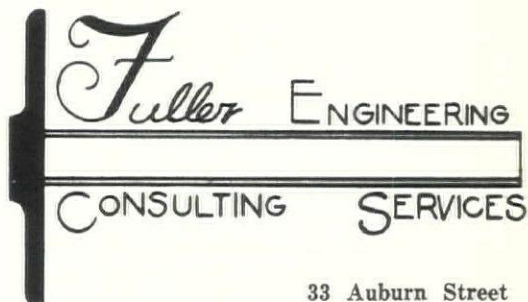

As further plans develop for the meeting, they will be published in New Hampshire Architect, Mr. Holbrook said.

## GUY MacMILLIN NAMED TO BOARD OF DIRECTORS

President Avery R. Schiller of the Public Service Company of New Hampshire, announces the election of Guy E. MacMillin of Keene to the board of directors of the company.

Mr. MacMillin, prominent New Hampshire contractor, was elected to fill the vacancy on the board created by the death of the late Philip E. Faulkner, also of Keene, Mr. Schiller stated.

ASSOCIATES, AIA**  
Keene, N. H.

#### **GENERAL CONTRACTOR:**

**MILLARD R. ULIN**  
Lyme, N. H.

Woods, fields, mountains and lakes dominate the environment of Cardigan Mountain School and give it unique flavor. The ever-changing aspects of Cardigan Mountain itself dominate the eastern horizon. City bred tensions disappear in these uncomplicated, natural surroundings. Studying is easier without artificial distractions.

In the classroom the emphasis is on the fundamentals — reading, writing and arithmetic. Throughout the whole school experience the development of character and leadership are of prime importance. Recreational activities are outdoors. In addition to the traditional football, skiing, hockey and baseball, Cardigan boys have an opportunity to learn the skills of the woodsman, fisherman, canoeist, mountain climber and camper.

Each boy is expected to develop a sense of responsibility for the welfare of the school community and contribute to it. Each one cares for his own room and shares in the schoolkeeping chores.

The new 140 acre campus on The Pond which extends into Canaan Street Lake at an elevation of 1,200 feet. The principal buildings are located amid the fields and woods of the old Haffenreffer estate whose mansion house had been remodeled into Clark-Morgan Hall for classroom library and offices.

In 1957 additional and improved classroom space and administration quarters became necessary because of increased enrollment. Hopkins Hall, the new classroom and office building was constructed in 1958. Classrooms are designed for 20 to 25 boys in keeping with the school policy of small classes. Special classrooms for language training, music practice and science have been incorporated into the building to increase the teaching facilities of the school.

Clark-Morgan Hall was remodeled in 1958 to become additional space for students. Two dormitories, Brewster and Hinman Halls, each houses 36 boys and have faculty apartments. An auditorium, recreation room, dark rooms and utility rooms are included in the dormitories.

# CITY SAVINGS BANK, LACONIA, N. H.

NORMAN P. RANDLETT, AIA ARCHITECT, Laconia, N. H.

WINSTON P. TITUS, GENERAL CONTRACTOR, Lakeport, N. H.

The City Savings Bank of Laconia opened its new building for business on December 21, 1959.

Two entrances to the bank have been provided. On Main Street is a vestibule to the banking quarters, and to stairs to the lower floor where the trustee's room is located. The latter is available for small groups not associated with the bank and can be used day or night without entering the areas used by the bank. In the vestibule is a display case enclosing a model of the old lake boat the "Mt. Washington." Also in the vestibule is the night depository.

A second entrance, at the rear of the public space in the bank, opens to a corridor to the Laconia National Bank and to a parking space.

The exterior of the building is Roman brick and Bethel white granite backed up with Norlite blocks. Trim is aluminum. Glass is a prominent feature. The windows

on the street elevations are double glazed with plate glass. One of the sheets of glass in each window is tinted gray to reduce glare and heat from the sun.

Overhanging the sidewalk is a canopy with snow melting cables. Water from the canopy is carried away by drains.

A wood grained plastic laminate was used for dadoes and for the tellers' rail. In the rail one of the stations is very low for use by children.

In the public and clerical areas vinyl corlon flooring has been used, with carpeting in the private offices.

In the banking areas acoustical plaster was used on the ceilings, with both recessed and cove lighting. Over the ceiling are the air conditioning ducts.

Heat is supplied by forced hot water. Year around air conditioning has also been provided both for the bank and for the store in the building.
